

MONOCOVE-XXM

MONOCOVE-XXM is a efficient, modular, connectable and seamless miniature linear LED lighting system. The integrated connector system enables the XXM to be quickly and easily installed within architectural lighting details such as coves, slots and coffers.

Manufactured from extruded anodised aluminium, with silver finish, as standard. Custom powder coated options (white / black / RAL) are also available. The 21mm shallow profile, combined with opal cover and industry leading Nichia LEDs, provides a miniature and connectable luminaire with uniform 'dot-free' diffuser.

A wide range of LED options are available, with a choice of Nichia, Osram and Lumiled LED. Colour temperatures range from 2000K ~ 6500K with power output options ranging from 4.8w/m ~ 24w/m. Each PCB module has an on-board Integrated Controller (IC), for precise constant current control, whilst a Schottky diode provides reverse polarity protection.

Technical data is subject to change without prior notice. The data provide represent typical values. Due to tolerances in the production of components and binning of LEDs, values for lumen output (Lm), colour temperature (CCT) and power (W/m) can vary up to 10%. Electrical and thermal variation also influences the performance characteristics of LEDs
